Hello,

"The Association element specifies the relations ship between the current force or side and the other specified forces or sides."

Unless I am mistaken, the sentence is for only one association ("The Association element specifies") so that

"the other specified forces or sides."

should be

"the other specified force or side."

Francois.

Francois, A couple questions

Could you give me the specific text you want changed. All plurals seem to match as far as I can tell.

#133 - Should have been line 1000, it is now line 1028

Thanks

Rob
